WHEN PANELS OR ANCHOR PLATES ARE WANTED GIVE SIZE

By having these cards made $3\frac{1}{2} \times 6\frac{1}{4}$ they will fit a No. 6 $\frac{1}{2}$ envelope. If you send them out with your invoice and correspondence and request that they be returned to you properly filled out, and should any of them reach us instead of going to you, we will at once know by the number that they are from your firm and we will quote the parties the regular retail price, and when sale is made *credit your account* with the difference between wholesale and retail prices, less a small fee for our trouble and correspondence. By this system we hope to give every merchant the full benefit of his advertising and also satisfy a certain class of trade who think they can do better when they send out of town for goods. Our many years of business experience will be sufficient evidence that it is our purpose to work for your benefit and at the same time increase the sales of our Stove Repairs.

TO THE TRADE.

This encyclopedia of Stove, Range, Furnace, Steam and Hot Water Repairs, we believe to be the most complete work of its kind, and if you find it so, will you make it your favorite book of reference?

BREVITY.

We have increased the usefulness of this work by condensing into a small space the names of stoves made under one name by various firms, although one has no relation to the other. To illustrate:

Gem (Parlor Cook) is made by seventeen different firms, all are Nos. 7 and 8. By our arrangement it will be quite easy to find any name or make of stove you desire.

ILLUSTRATIONS.

We have procured illustrations of repairs for some of the more complicated lines of stoves, furnaces and steel ranges. We desire to especially call your attention to our illustration of Majestic, Monitor, Home Comfort, M. & D., Quick Meal, Reliable, Van, etc. These cuts do not by any means cover our line, but are intended as partial guide in ordering repairs. We realize that fully 95 per cent of our trade are perfectly familiar with a Duplex, Draw Center or Flat dumping grate and for this reason we have not filled our Catalogue with page after page of such parts, although such parts will be found on some of the numerous plates distributed throughout our book.

SPECIALTIES AND ADJUSTABLE

Repairs will be found in the center of our catalogue between M and N. We insert this in the center of the book and trust that as you have occasion to look through the book from day to day you may be reminded that our specialties are always seasonable goods, and to keep a stock of them on your shelves will give you a class of goods, not usually carried by department stores, and goods that can be sold at a reasonable profit.

BUREAU OF INFORMATION.

We have a very large library of records pertaining to Stoves, Ranges, Furnaces, Steam and Hot Water Plants. Should you desire information of any kind we are at your service.

We desire to heartily thank you for your support in the past and trust that the future may bring to us a portion of your stove repair trade, which will have our careful attention.

Respectfully yours,

ROBERT UHLIG, President.

GEO. A. WILCOX, Treasurer.

HUGO SCHMIDT, Vice President.

HOW TO ORDER REPAIRS

FOR the benefit of those who have had but little experience in ordering repairs, we desire to say that not one in ten of your customers knows how to order repairs, and you must supply their knowledge or else you will have misfits on your hands. We would first of all suggest a customers' sales book, where a complete record is kept of every stove you sell, so that you can confirm your customers' description. If you have no such record, compare your description with our catalogue and if it is not right insist on your customer getting it correct. There are but few 7, 8 or 9 stoves made in the last ten years, nearly all Garlands, Acorns, Riversides, Banquets, etc., have prefix or affix, special number, and often times a letter as A, B, C, D, etc. The following are a few of the questions you must ask your customer: Name, Number, Date, Make, Range or Cook, Wood or Coal, Cast or Steel, Pouch or Front Feed, Style of grate, Duplex, Draw Center or Flat Dump grate, Iron or Brick lining, is fire box on Right or Left end of Range, Water Back or Front used, if so, what shape or style is it. Describe each piece you want and face the hearth of cook stove and call parts Right and Left as you look at it. Ranges—Most manufacturers call the oven door the front, and in ordering odd pieces of ranges you should face oven door. In ordering fire box linings order the same as for cook stoves.

GEORGE A. WILCOX, TREASURER.

FURNACE, STEAM AND HOT WATER REPAIRS.

(See Illustration on page 15.)

O

OUR stock of Fire Pots and Grates for the above line of heaters is quite large, but by no means complete. If we have in stock what you want *we can save you money both in cost of goods and saving of freight.* If not in stock we will telegraph or order by mail for you direct from the factory such parts as we may not have and it will cost you no more than if you order direct from the factory yourself, adding differential in freight.

Make your orders for such repairs read: "Ship to me set grate bars or fire pot for (description of Furnace, Steam or Hot Water heater). If not in stock order by telegraph or mail from factory and charge me extra transportation. In ordering Furnace repairs always give trade marks on old parts; note carefully our description following name of furnace or heater. Fire Pots for furnaces made in two or three parts are apt to cause some trouble, as when upper or lower pot burns out, and only one is ordered; the other one may be expanded as to not fit with a new one. This is often the case when not a crack or bulge can be seen but a new upper and lower pot would make them fit together perfectly. Always give us measurements, if possible, of fire pots, and state if such measurements are inside or outside.

HUGO SCHMIDT, VICE-PRESIDENT.

SYNONYMOUS TERMS

Hopper Feed or Pouch Feed is a door that lifts up on top to put in coal.

Closed Front is a stove or range having no feed or opening of any kind except to put coal in through lids.

Front Feed is a stove or range having a feed door forming a part of the upper top or front of stove.

Broiler Door Feed is a stove or range having a swinging door just under the front main top, usually wide enough for a broiler to slide in over a hard coal fire on which to broil steak.

Right-Hand Range is one having fire box on right end of range.

Left-Hand Range is one having fire box on left end of range. A good many firms call their ranges Right and Left-Hand Oven, thus, a range having a right-hand oven would be a left-hand range, and a left-hand oven would be a right-hand range.

Single Fire Back is a stove or range made with a heavy front oven plate, thus dispensing with an extra back.

Front of a Range is in front of an oven door.

Front of a Cook Stove is in front of hearth.

Right or Left always means when you stand in front of a range or cook and looking at it.

Full Fire Box consists of a Front Grate, Fire Back, Lower Grate, Grate Rest and End Linings.

In Ordering it is always best to be explicit and name each piece separate.

C. M. EATON, SECRETARY.

PRACTICAL ADVICE

B

E careful in ordering stove repairs, and should you receive repairs that do not seem to fit properly, write us about it, giving us the Trade Marks on our repairs, and if possible the Trade Marks on the old repairs, but do not return goods.

The following are a few of the reasons why repairs may not seem to fit perfectly: Original repairs may have been taken out and thrown away and a set of adjustable repairs substituted. Should you order a front and bottom grate and we sent them, they would not fit without a grate rest, which, in such case, you should order. Many ranges are made with fire box on either right or left end of range and use different linings. Your customer may give the year the stove was first patented but not the year the stove was manufactured; always give the latter date. You may order a Flat grate when you intend to order a Draw Center grate. You might order a Duplex grate when you want a Ransom Duplex grate, (Ransom grate has a shaking ring around the Duplex grate.) A fire pot may not seem deep enough; a pot used from 3 to 6 years will be fully $\frac{1}{4}$ to 1 inch deeper than it was when it was new. There are many reasons why repairs do not seem to fit; write us fully before returning and we can usually suggest a remedy.

WATER FRONT SECTION.

WATER ATTACHMENTS

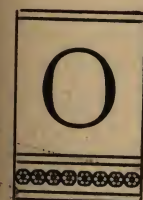

W

E probably carry in stock the largest stock of Hot Water Attachments of any firm in the country. This includes all kinds of Water Fronts and Water Backs for Cast, Steel or Hotel Ranges, as well as a full line of Water Heaters to put into furnaces for supplying any quantity of hot water. [See Index]. Water Heaters for Ranges are made in various shapes, the straight, L shape and U shapes being most popular; describe kind needed and we can supply them for any make of stove or range. For Steel ranges state if you want water front for Pouch Feed style or Top Feed; also say if Heater is to fit next to the oven or on opposite side, and if double-oven range say if heater goes on Right or Left side of Fire Box, or, if any odd shape, be sure to send us drawing of where it fits in fire box.

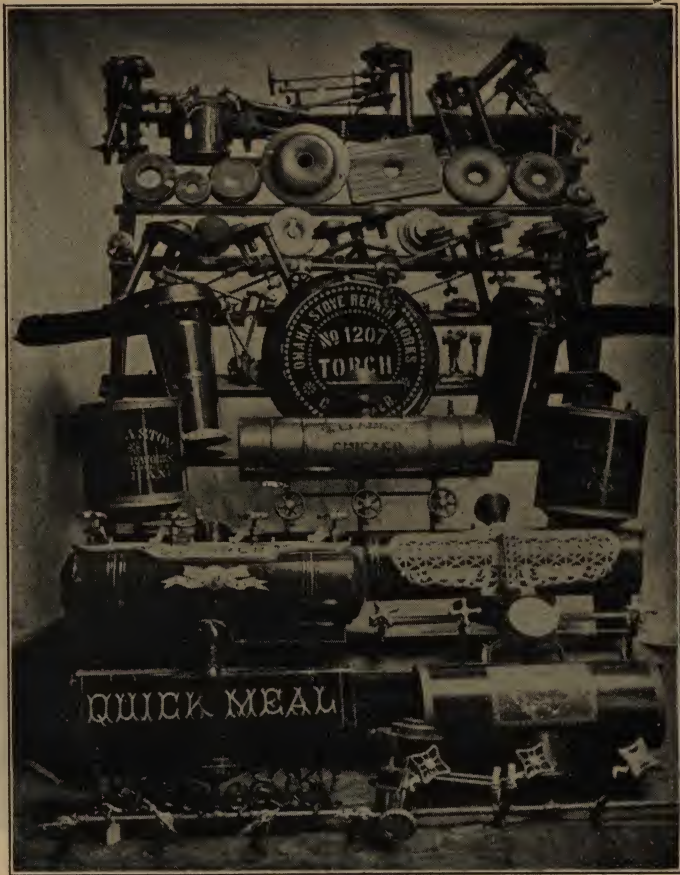

HEATING STOVE FIRE POTS.

TERMS

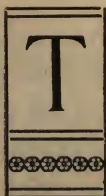

OUR accounts are mostly small, and as we have thousands of them we must request our customers to remit promptly on the 1st day of month following purchase of goods. Do not send Personal Checks—such checks must be deposited for collection and bankers charge for their time and expense, and unless the check is \$20.00 or over we cannot afford to pay from 15c to 35c for each collection. We do not mean to say that your check is not paid in full by your banker, but the expense comes from passing it through the clearing houses at this end. Our accounts being small you will notice that the percentage is very great when 15c to 35c is deducted from a check of several dollars, and for that reason checks are undesirable (unless made payable in Omaha.) We therefore request that for amounts of \$2.00 or less you send 2-cent stamps, and from \$2.00 and over, Omaha or Eastern Exchange, Postal or Express Money Orders, which are payable at par.

GASOLINE STOVE REPAIRS.

CHANGES IN GASOLINE STOVES.

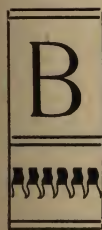

HE changes in Gasoline Stoves are so many as to make it impracticable for us to illustrate or describe the various parts; nearly all Gasoline Stoves have but a poor description as to number, maker, date, often the only record is what is on the tank, and this may have been changed several times.

We carry in stock Tanks,—upright and laydown—Generators, swivel joints, stand-pipes, burner caps and about all parts that wear out by constant use; this applies to single generator stoves, individual burner, New Process, etc. (repairs for Oil stoves, we do not carry in stock). All small pieces to be duplicated should be sent to us by mail or express, prepaid, and with your name written plainly on the tag, and a letter of instructions should follow, giving the name and maker of the stove. We cannot accept goods sent to us not prepaid. See Index for further description of Gasoline repairs.

READ CAREFULLY

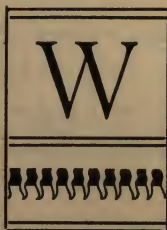

BY special arrangements with the manufacturers we are enabled to furnish **Original Repairs** for a large per cent of the stoves listed in the following pages. Merchants will appreciate this arrangement, as it assures them repairs that fit perfectly. We invoice all of our repairs to fit the stoves and furnaces they are ordered for, and guarantee that such repairs as we furnish will fit perfectly, and have the lasting quality so eagerly sought after by all users of stoves and ranges.

Do not mutilate or tear leaves out of this book; we will know what you want if you give us page or plate number and marks on cuts that you want to describe.

SECTION OF STEEL AND MALLEABLE RANGE REPAIRS.

HOTEL, STEEL AND MALLEABLE RANGE REPAIRS.

WE are making a specialty of Repairs for Hotel, Restaurant and State Institutions. We have for a number of years made this one of our special efforts, and to-day can supply almost any repairs called for. You can get this class of business in your vicinity if you will look after it. In ordering state if range is single or double oven, give diagram and size of top panels or anchor plate, and be sure to say if

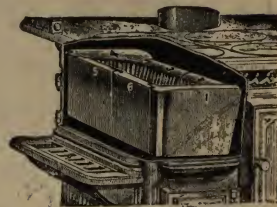

lids are 7, 8 or 9 in., and if water back is used state kind and where it is situated; describe parts by facing range and call Right or Left as you look at range. A double oven is a Range with one fire box and two ovens; do not call it a double oven when two or three single ovens are connected together, but make us a rough drawing of range and parts wanted

Our Illustration shows a variety of Repairs for Furnace, Steam and Hot Water Heaters. Further description will be found on page 7.

 Charter Oak. (Stoves and Ranges.) G. F. Filley. Excelsior Mfg. Co. Be sure to give correct number. The old style numbers, 70, 80, 90, etc., will usually be found on front door or on top. On all numbers above 100 the number usually will be found on main top of stove or range, just opposite end of long center, engraved on top. Sometimes it is covered over with blacking. If so, blacking must be scraped off to show number plain. In ordering centers, say if you want reversible long centers or single thickness; also say if you want covers and short centers lined or not. We carry a full line of coal and wood fixtures, hot water centers, etc.

Gold Coin

DOES YOUR ORDER COMPARE WITH OUR CATALOGUE?

- Gold Coin.** (Steel Ranges.) Chicago St. Wks. Always give correct numbers. State if pouch feed or closed front, and say if range has portable reservoir on left side or not. When stove has prefix, such as "Imperial," "Standard," etc., be sure to give full name, such as "Imperial Gold Coin." Give size of panels.
- Gold Coin Heaters.** Chicago St. Wks. All heaters made by Chicago St. Wks. are called Gold Coin. It is necessary to always give the correct number and date of stoves. In ordering repairs for Oak stoves be sure to say if inside or outside pots are wanted, and if grates are draw center or cone center.
- Gold Coin Wood Cooks and Wood Ranges.** Chicago St. Wks. All Gold Coin wood stoves, excepting No. 8 and 9 made prior to 1880, have numbers such as 80, 90, 109, etc. If date is later than 1880 be sure to give correct number.
- Gold Coin Stoves and Ranges.** Chicago St. Wks. There are no plain 7, 8 or 9 coal cooks or ranges made. Numbers run 22, 23, 24, 25, 26, 27, 28, 29, 3-18, 4-19, 5-18, 142, 144, etc. Be sure to give date, and do not order 318 when 3-18 is wanted. When stove has prefix to word Gold Coin, such as "Grand," "Novel," "Modern," etc., be sure to give full name! Be particular to give correct number or date, and describe style of grate, and if back is in more than one piece describe how many. We intend to carry a complete line up to date!
- Gold Coin.** (Cannon.) Chicago St. Wks. No. 01, 02, 03, 04, 05.
- Gold Coin.** (Round Base Burner.) Chicago St. Wks. No. 3, 4, 5, 6. Give date.

5 lb. Cans, packed, 6, 12 or 24 cans, in wooden boxes.

WRITE FOR PRICE.

Yellow Label Benzine**Liquid Stove Polish.**

Realizing that a great many dealers are called upon to furnish their customers the same kind and quality of polish which they use on their sample stove, we are putting up this excellent polish up in a convenient and handsome retail package, to sell to the consumer, at 15 cents per can. No dealer can afford to be without this class of goods.

10 oz. Cans, packed,
3 dozen in case.

STOVE BLACKING.

A fine blacking. Large $\frac{1}{2}$ -lb. can, retails at 10 cents, twice as much blacking as other 10-cent packages contain. $\frac{1}{4}$ -lb. cans, packed, 3 doz. in case.

 16-oz. can, paste, 1 dozen in case.

One-half pint cans, with brushes, in handsome display cartoons, holding one dozen cans. Also put up in gallon cans for shop use.

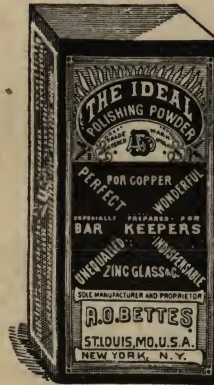

For use on steel ranges, steel cooks, gas and gasoline stoves. Stove pipe, steam and water pipes, boilers, smoke stacks, furnace fronts, fire escapes, iron fences, radiators, registers, and everything on which a jet black gloss finish is desired.

The best, most brilliant, jet black iron enamel on the market today. Do not confuse this enamel with other inferior, worthless kinds. Pay just a trifle more than the cheaper kinds would cost you and get the best.

IDEAL METAL POLISH AND ALUMINUM ENAMEL.

NEW YORK, N. Y.

The Liquid Ideal Metal Polish

Is the only kind that does not scratch the most highly polished metals, whether brass copper, gold or silverware. It is not injurious to metals, and cleans every kind of metal. Liquid polish is especially good to clean nickel plated parts of stoves.

Put up in six sizes:

- No. 0. 1-6-pint cans, 3 dozen in case.
- No. 1. $\frac{1}{2}$ -pint cans, 1 and 3 dozen in case.
- No. 2. 1-pint cans, 1 dozen in case.

Ash Pit or Flue Doors.

Sizes: 8x8, 8x10, 10x12, 10x14, 12x15, 16x16, 16x20.

For ash pits, bottom of chimney, bakers' ovens, etc.

Heavy, strong, smooth, well fitted and jappanned.

ASBESTOS, CEMENT AND PUTTY.

Our Gas-tight Asbestos Retort Furnace Cement is appreciated by every furnaceman, because it hardens slowly, thereby preventing cracks and "pulling away" from iron, which is caused by cement setting too quick. A furnace put up with this cement remains absolutely gas tight.

Put up in five sizes: 25-lb. cans, 10-lb. cans, 5-lb. cans, 2-lb. cans, 1-lb. can.

ASBESTOS.**Asbestos Paper in Rolls.**

For covering hot-air pipes, to prevent the radiation and loss of heat in the basement, and secures the benefit of the heat in the living rooms, as well as to obviate the danger of igniting surrounding woodwork from overheated pipes.

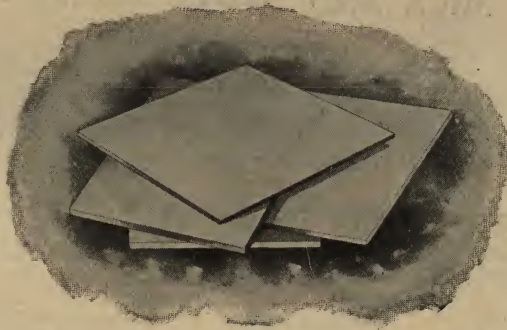

Made in various thicknesses, averaging 6, 8, 10 and 14 pounds per 100 square feet; it is 36 inches wide, and put up in rolls containing about 100 pounds. Price, per pound

WE RECOMMEND NOTHING LIGHTER THAN 10-POUND PAPER.

**Asbestos Millboard in Rolls.**

Used for the same purposes as asbestos paper, especially when heavier material than 14-pound asbestos paper is desired. We recommend this millboard as the most effective material for hot-air pipes. Put up in rolls about 36 inches wide, averaging about 100 pounds per roll. Per pound....

ASBESTOS.

Asbestos Sheet Millboard.

Our Asbestos Millboard is in general use for protecting walls, ceilings and joists from overheated surfaces. It is absolutely fire proof, and is extensively used for packing joints of all kinds about steam plants, and to line steel range and steel cooks.

It is furnished in sheets 40x40 inches, from 1-32-inch to $\frac{1}{4}$ -inch thick.

Asbestos Wick Packing.

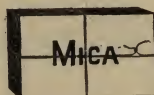

Is made of pure asbestos fibre, acid and fire proof. Used for packing steam pumps, tubes, valves and gasoline stoves. $\frac{1}{4}$, $\frac{1}{2}$ and 1-lb. balls. Per lb.....

Hot Blast Cement Felting.

Composed of asbestos and other fire proof material, especially prepared for superheated places. Used for covering furnaces, steam and hot water pipes and elbows. For use, mix to thickness of mortar and apply with trowel. For furnace pipes we recommend asbestos paper and above cement; for elbows and body of furnaces, from bottom of feed door up, apply two coats of one-half inch thick. Iron lath or wire netting can be put on first, although not necessary. Finish by covering furnace with cheese cloth dipped in flour paste. Sold only in full sacks, about one hundred pounds.

Hot Water Heaters

General Information

WE carry in stock a sufficiently large variety of Water Heaters to meet every requirement.

There are Thousands of homes heated with Furnaces having one, two or more rooms that cannot be heated. By the use of one or more of our Water Heaters such rooms can be made the most comfortable in the house and practically without any additional expense and in many cases a greater amount of radiation can be secured from the furnace, especially a furnace having a steel dome, as by using our Circular Giant it deflects the heat to the sides of the steel dome.

In sections of country where there is a large lime deposit in the water we recommend the Maltes Heater as by its peculiar shape it throws all sediment to the arms of the cross and it takes a long time to fill them with sediment. When two or more are used always use a $\frac{3}{4}$ size at bottom, this allows them to fit very close to fire without interfering with the feeding of the furnace.

Little Giant can be used anywhere or in any kind of a furnace.

How to figure Radiation or size of heater required: Multiply the length and width and height of your room to find cubic feet to be heated, divide by 25, to this add a little for pipe to be used and you have size required. We will at all times be pleased to help you figure over any problem you may have with Hot Water or Hot Air Furnace Heating. If our many years of experience will be of any service to you kindly write us fully what your difficulties are and we will be pleased to assist you to the extent of our knowledge.

Eclipse Furnace Hot Water Heater.

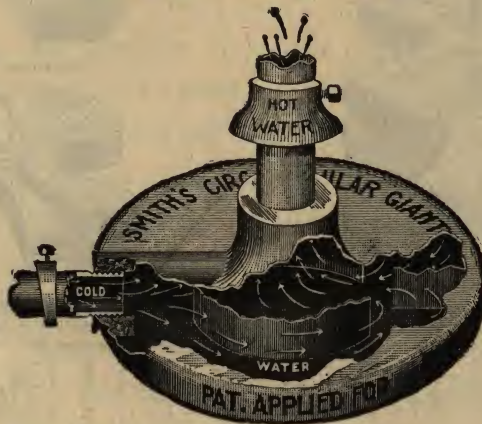

No. 8 will heat 30 gallons; pressure of boiler, \$2.25 net.
 No. 9 will heat 40 gallons; pressure of boiler, \$2.75 net.
 No. 8 carries 15 to 20 feet of radiation.
 No. 9 carries 20 to 30 feet of radiation.

Smith's Laundry Heater.

10½ inches in diameter, 2 inches high; very handy to put in 2-hole laundry stoves and heaters of any kind. \$3.00.

Smith's Circular Giant.

Made in six sizes, from 14 to 24 inches.
 Can be placed in any furnace, but especially adapted to one with large drum or dome, in which it acts as a deflector, throwing heat to sides of furnace and increasing the capacity very materially.
 Will heat from one to eight rooms with hot water, and is also effective in heating large tanks.
 Has no joints.
 Saves fuel and at the same time insures better heat.

Smith's Little Giant Water Heater.

Is made in four sizes.

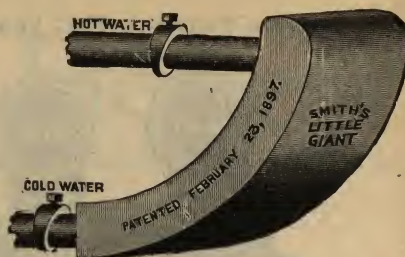

Can be placed in any furnace and has no joints to leak or rust.

May be used to heat from one to four rooms, or in heating tanks, for which purpose it is unexcelled.

Has been tested for years and has never been known to clog.

Should be placed just above fire pot.

The capacities as given below are, if anything, too conservative, as the heater is in many cases doing more than rated to do:

Adjustable Repairs

Includes everything that is worth using as adjustable repairs. They are smooth, light, with perfect breaking grooves. Whenever new and desirable adjustable repairs are placed on the market we will add them to our now complete line.

INSTRUCTIONS

For Reducing Castings and Fitting Them in a Stove.

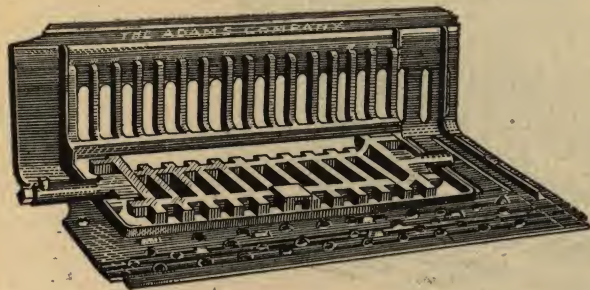

Place the part to be broken off on the corner of a square piece of iron, or point of a flat iron, with the deeper groove up, holding down firmly, then strike with a hammer hard enough to check but not entirely separate, slide along and check farther; when you have it checked properly, strike a quick rap and the piece will come off straight from one end to the other.

If you want to reduce more than one groove, the safest plan is to break off one at a time to the desired size.

In fitting a full set, you first fit the Basket Grate. Be sure it fits down firm and smooth at front flange. This is done by breaking the corners off the flanges in case the rods at corners interfere. Then you fit the Back; get it down tight on oven plate by reducing it at the bottom edge. This done, you fit the End Linings; first, by getting the proper slant to fit the back, and next by reducing at the front edge to proper width, have them fit close to the sides of the stove at the top, and a good slant out at the bottom does no harm.

DOMESTIC BASKET GRATE.

Design Patented January 5, 1897

(THREE SIZES)

The three sizes of Newby's Domestic Basket Grates constitute the best basket grate ever made, and come nearer to the original linings than any ever before on the market. They are all fitted by reduction, our Crescent Back and End Linings fit well with them, or the original repairs can be used. They will fit almost any 7, 8, or 9 stove made using a square or oblong firebox.

 No. 8. Size $21\frac{1}{4} \times 21\frac{1}{4}$ weight 30 lbs.
 No. 9. Size $23\frac{1}{4} \times 23\frac{1}{4}$ weight 36 lbs.

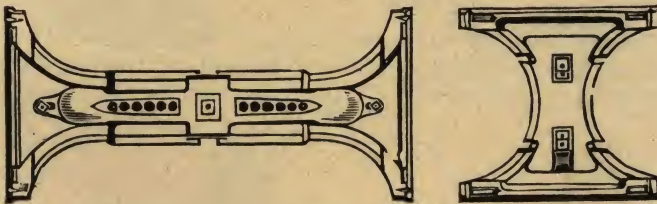

Above weights include one long center, two short centers, and four covers.

This top is made to bolt down on top of the old frame by drilling holes in old frame to match those in new top.

When a stove is repaired with this top it will not warp or sink down in the center. It makes the stove draw better on account of a larger throat over the oven plate. It takes the place of original centers when these cannot be had.

Eaton's Brick Holding Center Post

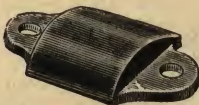

No. 1. Will fit most ordinary stoves.

No. 2. Is made to adjust in height. It is made in two sizes, called No. 2 Short and No. 2 Long.

No. 3. Will fit any stove or range ever made. By the long slot it can be moved backward or forward on oven plate, and will cover any space in a circle of 10 inches in diameter. It is made in two heights: No. 3 Short, $2\frac{1}{2}$ inches high, adjusts to 3 inches high; No. 3 Long, 3 inches high, adjusts to 4 inches high.

If clamp is not needed for holding fire back, turn it over and it protects the post and keeps bolt from burning off.

LID CLIPS

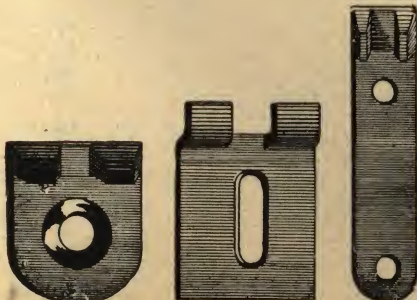

For bolting on the under side of covers or centers, to cover lifter hole where the lining is burned off.

DAMPER SUPPORT.

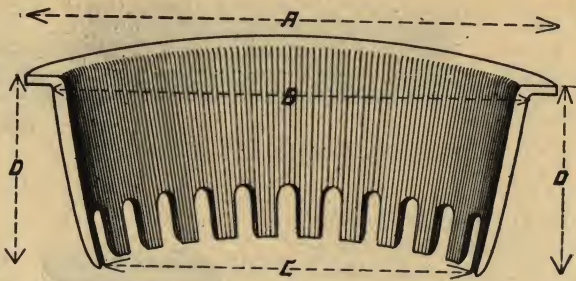

For bolting to flue strips or back oven plates when damper supporters are burned off

HOOK PLATES

Hook Plates for drawing stoves together where they have been pressed out of shape by expansion.

BLAKE'S ADJUSTABLE FIRE POTS.

- A—Measure diameter over all on top of your old fire pot.
 B—Measure diameter under flange outside of your old fire pot.
 C—Measure diameter inside at the bottom of your old fire pot.
 D—Measure depth or height straight up and down of your old fire pot.

Read carefully the instructions and give measurement of old fire pot as shown by dotted lines in the cut.

You can then readily see if any size in the following table will answer your purpose.

A new inside fire pot should measure at bottom (line C) full one-half or three-fourths inch smaller than your old fire pot, as they always expand out at bottom.

These pots can be used without grate if your old grate is good.

How to Order Fire Pots.

Give the diameter from outside to outside of flanges on top.

Give diameter underneath flange outside.

Give the diameter inside of flanges on top.

Give the diameter inside at bottom.

Give depth of fire pot straight up and down.

The above instructions are very simple, and by sending the measurements of the old fire pot we can furnish pots that will answer at same price as the Adjustable Repairs.

These magazines are used a great deal on Oak Stoves, especially where parties desire to burn hard coal and are fastened underneath the main top. The magazine is filled from the top through the lid or covers, any one of which can be used for the top section.

Lengths can be made as follows: 6, 9, 12, 15, 18, 21 or 24 inches.

ORIGINAL STOVE LEGS.

SHAKERS FOR DUPLEX GRATES.

Order by size of holes as shown in small cuts.

FIT-'EM-ALL SHAKERS.

The peculiar shape of the hole in this shaker will fit any shape of grate shank, whether it be round, flat or square. The pins on the end will fit shanks with two holes, and the tapering slot in the other end will dump any square or flattened grate shank.

If possible, give trade-marks on old repairs to be duplicated. Special care should be given in ordering hot water fronts to state if they are straight (repair 64), "L," (repair 61), combination "L," (repair 63). See plate 46. In addition to water front illustrated, we have new style water fronts to fit pouch feed stove or reservoir water heaters (repair 87 plate 46).

No. 1 R. Open Back End Lining.

No. 2 R. Open Front End Lining.

No. 3 R. Solid Front End Lining.

No. 4 R. Solid Back End Lining.

No. 5 R. Left Hand Lining.

No. 6 R. Right Hand Lining.

THE above old style linings were used in 1896 Steel Ranges, and with the exception of the right hand lining, No. 6 R., are never furnished for repairs. Where this one piece is desired for repairs we can furnish improved right hand linings as shown on page 43, that will fit perfectly. Always order these linings by letter and number. Where any other part of linings are ordered for 1896 Ranges, we can only furnish our 1897 pattern of linings complete in sets, and they should always be ordered that way.

By referring to the above cuts, you will note front and back end linings have both sides projecting the same length, and that the right and left hand lining are also of the same length, which differs entirely from our improved 97 linings.

Always note the above in ordering and you will have no trouble in describing style of lining in Range you are ordering repairs for.
